AFRIKA TIKKUN was formed in 1994 as an answer to the National Development Plan's need to uplift and develop communities in South Africa. Our extensive work over the last 23 years in social development, skills development and education, positions us uniquely to understand the challenges and requirements of transformation, the current 'growth agenda' and its priorities for mass employment and inclusion.

We can assist companies in evaluating its transformation mandate against both revenue targets and social impact outcomes. With learnerships proving to be a vital element in the skills development toolkit for companies' transformation agenda, we strive to develop an entry to mid-level workforce, aiding the empowerment of young job seekers and future leaders.

Further to this, we focus on providing equity ownership to clients looking for a broad-based black economic empowerment partner. We have over the last few years developed our internal commercial capabilities and have partnered with a number of skilled professionals to develop and evolve in line with the objective to be an optimal Broad-Based Black Economic Empowerment partner.
